**Learning objectives:** Advanced training of students fighting a fire and conducting research and rescue works for fire safety purposes, aimed at competence development, necessary for professional activity on satisfying the fire safety requirements in air transport. And also acquiring of knowledge and skills allowing to control effectively military operations of rescue fire squad in fire fighting and conduction of rescue works, necessary to be attested for confirmation of “rescuer” status.
«Interaction with the «difficult» passenger of an aircraft»

Length: 16 hours (8 hours – self-study, 8 hours – classroom)
Methods: self-study, seminars, lectures, training
Form of study: classroom, online
Course language: Russian
Price: 7800 Rub.
Code: PPK-36

Learning objectives: Training of students in the field of aviation psychology and personality behavior in stressful situations in connection with the specifics of the activity. Achievement of the required level of competence in the performance of professional functions: effective interaction of an employee of airport services with a "difficult" passenger; Communication in case of critical situations. The development of behavioral methods of self-regulation in the event of fatigue, aggressive reactions.

«Legal regulation of aviation purchases of goods, works, services to ensure state and municipal needs»

Length: 72 hours (48 hours – self-study, 24 hours – classroom)
Methods: self-study, seminars, lectures, training
Form of study: classroom
Course language: Russian
Price: 15600 Rub.
Code: PPK-51

Learning objectives: Advanced training of students in the field of aviation procurement of goods, works and services on the basis of Federal Legislative Act №44-ФЗ of 05.04.2013 "On the contract system in the sphere of procurement of goods, works, services to ensure state and municipal needs", the implementation of the customer's professionalism principle.

«Safe transport of dangerous goods by air: initial training (categories 1, 2, 3, 4, 5, 7)»

Length: 24 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 15600 Rub.
Code: PPK-47

Learning objectives: Advanced training in the field of legal regulation of the safe transport of dangerous goods by air.
«Safe transport of dangerous goods by air: periodic training (categories 1, 2, 3, 4, 5, 7)»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 13200 Rub.  
Code: PPK-48

Learning objectives: Advanced training in the field of legal regulation of the safe transport of dangerous goods by air.

«Safe transport of dangerous goods by air: initial training (categories 6)»

Length: 40 hours (16 hours – self-study, 24 hours - classroom)  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-38

Learning objectives: Advanced training in the field of legal regulation of the safe transport of dangerous goods by air.

«Safe transport of dangerous goods by air: periodic training (categories 6)»

Length: 24 hours (8 hours – self-study, 16 hours - classroom)  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 13200 Rub.  
Code: PPK-39

Learning objectives: Advanced training in the field of legal regulation of the safe transport of dangerous goods by air.
«Safe transport of dangerous goods by air (categories 8, 9, 10, 12)»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 13200 Rub.  
Code: PPK-14

Learning objectives: Advanced training in the field of legal regulation of the safe transport of dangerous goods by air.

«Passenger rights protection under the International Air Law and the EU Law»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: English  
Price: 18300 Rub.  
Code: PPK-50

Learning objectives: The course provides an overview of the most important private air law instruments - Warsaw System and Montreal Convention and passenger protection regulations in EU, such as EU Regulation 261/2004 and EU Regulation 1107/2006.

«The use of Airspace for general aviation purposes»

Length: 24 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-9

Learning objectives: The aim of training more professional program is to increase the level of professional knowledge of airspace users among the general aviation operators (except for operators of unmanned aircraft). In the process of training the existing legal regulation of use for flying manned light and ultra-light aircraft in private civil purposes is seen and analyzed. Legal regulation of aviation insurance issues are considered. The theoretical material is combined with the consideration of practical cases related to issues of administrative responsibility for violation of the use of air space. A review of an administrative offense in transport, as well as offenses in the field of business entities which are the general aviation operators and pilots.
«Operational and technical maintenance of civil aerodromes»

Learning objectives: Increasing the level of professional knowledge in the field of operational and technical maintenance of civil aerodromes.

Length: 16 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 13200 Rub.
Code: PPK-46

«Safety management system (SMS) of Services providers»

Learning objectives: Increase the level of professional knowledge in the field of safety management system (SMS) for staff of organization that are providers of services, i.e. developers and manufacturers of civil aircraft, organizations engaged in commercial air transport, maintenance of civil aircraft, air navigation services for aircraft flights, educational organizations and organizations engaged in training civil aviation personnel, operators of certified aerodromes of civil aviation, organizations providing ground services for aircraft and passengers.

Length: 16 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 15600 Rub.
Code: PPK-45

«The inspection, an additional inspectional, reinspectional in order to ensure transport safety in air transport»

Learning objectives: Improving the skills of staff members performing the inspection, an additional inspection, re-inspection in order to ensure transport safety, aimed at improving and (or) receipt of new competencies required for professional on execution to ensure transport safety activity in air transport, including requirements for antiterrorist security of objects (territories), taking into account the levels of security (hereinafter - the requirements to ensure transport safety), and (or) professional development within the framework of existing qualifications.

Length: 80 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 36500 Rub.
Code: PPK-12
«Ensuring transport security regarding air transport infrastructure»

Length: 40 hours  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 26700 Rub.  
Code: PPK-55

Learning objectives: Increase the qualification of employees appointed as persons responsible for ensuring transport security in the STI aimed at improving and/or obtaining new competencies required for professional activities to fulfill the requirements, including those which are for matters related to protection against terrorism, for ensuring transport security by modes of transport.

«Strategies of marketing, sales and resource management of airline »

Length: 24 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-24

Learning objectives: Overview of key modern models of sales and marketing strategies, the acquisition of skills and tools to optimize sales processes in the airline. Understanding and interpretation of customer needs. Increasing the level of professional knowledge in the field of effective marketing and sales strategies, organization and conduct of all the coupon shares (including in conjunction with airline revenue management models), including both traditional marketing resources and online resources aviation commerce.

«Passengers' maintenance and luggage service at the airport»

Length: 40 hours  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 26700 Rub.  
Code: PPK-4

Learning objectives: Expand the professional knowledge in the service of passengers of aircraft and baggage at airports of the Russian Federation.
«Organization of passengers and luggage service at the airport»

Length: 16 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 13200 Rub.
Code: PPK-56

Learning objectives: Raising the level of professional knowledge in the service of passengers and luggage at airports of the Russian Federation.

«Regulation of labor and social security relations with the participation of aviation personnel»

Length: 16 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 13200 Rub.
Code: PPK-19

Learning objectives: Expand the professional knowledge in the field of labor and social security relations with the participation of aviation personnel.

«Contemporary issues of International Space Law»

Length: 24 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 15600 Rub.
Code: PPK-31

Learning objectives: Obtaining theoretical knowledge in the field of International Space Law, acquaintance with the content of the main current issues and problems of the sector of Public International Law.
«International Space Law as a science and academic discipline»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 13200 Rub.  
Code: PPK-27

Learning objectives: Obtaining theoretical knowledge and practical skills needed for the teaching of the discipline of International Space Law in high school.

«Space Law in Russia: main trends and stages of formation and development»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 13200 Rub.  
Code: PPK-17

Learning objectives: Getting knowledge in the field of Space Law in Russia, introduction to the main stages and tendencies of formation and development of Russian legislation on space activities.

«Contemporary issues of Air Law»

Length: 24 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 18300 Rub.  
Code: PPK-16

Learning objectives: The European Union has progressiveley extended the competences of the European Aviation Safety Agency. The new proposal of the EASA Basic Regulation (the new regulation will replace Regulation 216/2008) give to european agency increased powers in the RPAS domein. The main learning objectives are: Awareness of the EU regulatory framework and its decision making process in civil aviation; Understanding the EASA Basic Regulation, EASA functions and competences and the roles and responsibilities of various players in civil aviation (ICAO, CAA’s, ATM/AND providers, operators etc.); Understand the current European legal framework with regard to UAV’s; Awareness of the insurance and liability obligations when operating an UAV in the European airspace.
«Legal regulation of the use of airspace»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 13200 Rub.  
Code: PPK-18

Learning objectives: Increasing the level of professional knowledge in the field of legal regulation of the use of airspace.

«Customs value of Goods: Principles and methods of determining the procedure for declaring»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-15

Learning objectives: The seminar (round table) will be of interest to participants of foreign economic activity. Theoretical aspects, review of legal and regulatory sources, comparative analysis supported by practical examples.

«Ground Handling Management (SGHM)»

Length: 72 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 56700 Rub.  
Code: PPK-29

Learning objectives: The course is based on the most recent IATA requirements, in accordance with IATA regulations.
«Use of unmanned aircraft for civil purposes»

Length: 24 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-6

Learning objectives: The aim of training more professional program is to increase the level of professional knowledge of airspace users among the operators and pilots of unmanned aircraft. In the process of training the existing legal regulation of use for flying unmanned aircraft is seen and analyzed, as well as novels of air legislation of the Russian Federation in connection with the entry into force 30.03.2016 Federal Legislative Act №462-ФЗ of 12.30.2015 “On amendments to the Air Code the Russian Federation regarding the use of unmanned aircraft.” The theoretical material is combined with the consideration of practical cases related to issues of administrative responsibility for violation of the use of air space.

«Terminal handling of cargo (mail) in air transport»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-22

Learning objectives: The purpose of training is to increase the level of professional knowledge in the field of terminal handling of cargo (mail) in air transport, including the organization of documents, the order of movement of goods and information, settlement system. The course details the structure and organization of the cargo complex, its technological and technical resources, the organization of work with claims and tracing cargo, as well as issues of security and procedure for interaction with public authorities.

«Handling of passengers with reduced mobility (PRM) at airport and on board of the aircraft»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 13200 Rub.  
Code: PPK-1

Learning objectives: Increasing the level of professional knowledge in the field of ground and onboard maintenance of passengers with disabilities at airports and on aircraft.
«Introduction to International air law»

Length: 24 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: English  
Price: 56700 Rub.  
Code: PPK-40

Learning objectives: Increasing the level of professional knowledge in the field of public and private international air law. Attention is paid to the comparative air law of the European Union and the United States, air law of the Russian Federation and the member states of the Commonwealth of Independent States. The course is taught in English.

«Development of the commercial strategy and organization of air commercial at the airport»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-8

Learning objectives: Increasing the level of professional knowledge in the field of airport commercial activities, aviation marketing, development and optimization of the route network (including the introduction of practical examples of the development model of "transfer hub"), maximizing of aviation revenue of airports.

«System of cargo terminal management»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-30

Learning objectives: Increasing professional knowledge in the area of cargo terminal management, technological support and quality systems in handling and maintenance of airlines.
«Package shipping and handling. Rules of transportation»

Length: 16 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 15600 Rub.
Code: PPK-7

Learning objectives: Increasing the level of professional knowledge in the field of equipment and cargo handling operations, as well as cargo transportation rules.

«The organization of sales of air transportation and attraction of cargo customers»

Length: 16 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 15600 Rub.
Code: PPK-3

Learning objectives: Increasing the level of professional knowledge in the field of sales of air cargo services, contractual work, including marketing component, the organization of workflow, the order of cargo movement and information, the settlement system. The course examines in detail the requirements for cargo agents and cargo, the organization of work with claims.

«Safety management system of aviation activities»

Length: 16 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 15600 Rub.
Code: PPK-5

Learning objectives: Increasing the level of professional skills in the field of safety management for the staff of operators’, airports, organizations of maintenance and repair services, aviation educational institutions.
«SLOT coordination, schedule formation and maintenance rules»

Learning objectives: The course provides a detailed study of the international regulatory framework governing the issues of forming a seasonal flight schedule. Students will receive detailed information on how to determine the capacity of the airport and the airport is classified as a level of capacity utilization and workload. Learn what "season of navigation", "slot", "series of slots", "historical slots" in which airports slots applied, what is the difference between ATS slots and airport slot. In the course students will be able to get acquainted with the requirements of Section 6 of the IATA Schedules Formation (SSIM), will examine in detail the sequence of procedures and airport coordinators and experts scheduled airlines in the formation flight schedule before the conference scheduled IATA (SCC), during the conference and after it. Students will receive information on how to prepare and take part in the conference.

«State regulation of the airports activities of the Russian Federation»

Learning objectives: Expand the professional knowledge in the field of state regulation of the airports of the Russian Federation.

«Overview ISAGO audits to prepare for the audit»

Learning objectives: Increasing the level of professional knowledge in the field of legal regulation and practical application of the requirements of operational safety audit of the International Air Transport Association (IATA) during ground handling of aircrafts (ISAGO).
«Work organization of the production and dispatch service of enterprise»

Length: 40 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 42300 Rub.  
Code: PPK-26

**Learning objectives:** The course includes the study of the requirements of international regulations governing the management of the airport and its major manufacturing processes. Students receive information about different types of bandwidth, get acquainted, how to evaluate and calculate the dynamic throughput capacity of the airport as flight schedule to generate the navigation season on the day, taking into account the declared capacity.

«Revenue management of air carrier»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-2

**Learning objectives:** Increasing the level of professional knowledge in the field of work with automated systems revenue management, as well as in the field of legal regulation overbooking for revenue management of the air carrier.

«Legal aspects of exchange operations of aviation equipment»

Length: 16 hours  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-49

**Learning objectives:** Increase the level of theoretical and practical knowledge, as well as the development of modern methods of solving professional tasks related to Exchange operations of aviation equipment. The course is taught in Russian.

aerohelp.com
«Legal protection of intellectual property in civil aviation»

Length: 24 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 18300 Rub.  
Code: PPK-25

Learning objectives: Increasing the level of professional knowledge in the field of legal regulation of relations of intellectual property protection in civil aviation.

«International regulation of labor migration»

Length: 24 hours  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-41

Learning objectives: Increasing the level of professional knowledge in subjects including international regulation of labor migration, international agreements of universal and regional nature, procedures and principles of international cooperations of states in this field, theoretical and practical issues related to population migration, and other issues.

«International environmental law»

Length: 32 hours  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 26700 Rub.  
Code: PPK-42

Learning objectives: Increase the level of professional knowledge in the field of international legal protection of the environment.
«Human factor in aviation and the problem of reducing its negative impact»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-20

Learning objectives: Increase the level of professional knowledge on the problem taking into account human factors in civil aviation.

«Maintenance of aircraft and commercial loading at airports of the Russian Federation»

Length: 16 hours  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PPK-44

Learning objectives: Increasing the level of professional knowledge in the field of aircraft maintenance and commercial loading at airports of the Russian Federation.

«Legal bases of the competent civil aviation authorities»

Length: 16 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 13200 Rub.  
Code: PPK-21

Learning objectives: Increase the level of professional knowledge in the field of state regulation of activity in the field of civil aviation.
Learning objectives: This Course focuses on special private air law that covers cross-border financing and leasing transactions relating to expensive aircraft, aircraft engines and helicopters which are used for commercial and private purposes in the Russian Federation and other jurisdictions. For example, the price of an aircraft may run up to Euro 220 million and of an engine up to Euro 25 million. The main objective of international aviation finance law is to facilitate the acquisition of these expensive aircraft objects. It creates significant financial benefits to countries at all stages of economic development. The legal regimes will lead to reduced prices of airline tickets and air cargo which benefits passengers and companies. This Course also addresses various international Court cases, including some disputes that have contacts with the Russian Federation. For example, when a debtor defaults under the loan or lease agreement the creditor must be able to repossess and de-register the aircraft immediately. Unfortunately, this is not always possible which creates economic risk. Consequently, the needed aircraft is not leased or financed or at unnecessary high costs.
There are two forms of training: classroom and online.

CLASSROOM is a training built on direct, personal communication with the teacher and other students who are in the same place at the same time. Final certification is carried out at the end of the training at the training venue.

ONLINE is a training that involves self-study of students on over educational material contained in the form of interactive modules that are accessed remotely. Before passing the final certification, this type of training allows students directly, using online technologies, to ask questions to the teacher and get answers to them without leaving their home or office. Final certification is carried out using online technologies.

Upon successful completion of advanced training and final certification, students receive an Advanced training certificate.
«Asean open skies: the progress so far and its impact towards foreign direct investment within the member states»

Length: 8 hours  
Methods: seminars, lectures  
Form of study: classroom  
Course language: English  
Price: 13200 Rub.  
Code: PSM-56

Learning objectives: 
Obtaining theoretical knowledge in the field of air law, precisely in relations with the current issues in ASEAN.

«General approach to European civil aviation regulations UAV’S»

Length: 8 hours  
Methods: panel discussion, lectures  
Form of study: classroom  
Course language: English  
Price: 15600 Rub.  
Code: PSM-33

Learning objectives: The European Union has progressiveley extended the competences of the European Aviation Safety Agency and has developed in the several stages the Single European Sky Infrastructure. The regulations governing the establishment and functioning of EASA and the Single European Sky framework are currently under revison with the aim to respond to current challenges civil aviation raises. The main learning objectives are: Awareness of the EU regulatory framework and its decision making process in civil aviation; Understanding the EASA Basic Regulation, EASA functions and competences and the roles and responsibilities of various players in civil aviation (ICAO, CAA’s, ATM/AND providers, operators etc); Understand the main pillars of the SES Framework; Know and understand what are the stakeholders involved and who does what; Ability to explain the following concepts: separation of oversight and service provider; subsidiarirty; mutual recognition; mandate; difference between service and function; certification; airspace concepts; Main provisions of the EASA and SES packages; Identify the upcoming challenges and risks.
«Aviation works performed using helicopters.»

Length: 144 hours (108 hours – self-study, 36 hours - classroom )
Methods: self-study, seminars, lectures
Form of study: classroom
Course language: Russian
Price: 7800 Rub.
Code: PSM-58

Learning objectives: The issues of legal regulation of the use of a helicopter for the purposes of aerial work are considered.

«Panic attacks on board of the aircraft»

Length: 8 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 7800 Rub.
Code: PSM-37

Learning objectives: Learn to recognize and cupping the acute psychological and psychosomatic situation on the board, which will help to continue the flight, not to make an emergency landing of the aircraft.

«Panic at the airport»

Length: 5 hours
Methods: seminars, lectures
Form of study: classroom
Course language: Russian
Price: 7800 Rub.
Code: PSM-35

Learning objectives: Increasing the level of professional knowledge of airport services employees in the field of social psychology. Formation of skills recognition manifestations of panic states. Training of airport services employees cupping methods panic states.
«Interaction with the passenger with aerophobia and other cases of panic attacks»

Length: 8 hours  
Methods: seminars, lectures, training  
Form of study: classroom  
Course language: Russian  
Price: 7800 Rub.  
Code: PSM-52

Learning objectives: Increased knowledge in the field of general psychology, psychology of fear to improve safety. Introduction to the causes of aerophobia. Training techniques assistance to passengers in the elimination of the fear of flying.

«General approach to European civil aviation regulations of UAV'S »

Length: 8 hours  
Methods: panel discussion, lectures  
Form of study: classroom  
Course language: English  
Price: 15600 Rub.  
Code: PSM-34

Learning objectives: The European Union has progressiveley extended the competences of the European Aviation Safety Agency. The new propsal of the EASA Basic Regulation (the new regulation will replace Regulation 216/2008) give to european agency increased powers in the RPAS domein. The main learning objectives are: Awareness of the EU regulatory framework and its decision making process in civil aviation; Understanding the EASA Basic Regulation, EASA functions and competences and the roles and responsibilities of various players in civil aviation (ICAO, CAA’s, ATM/AND providers, operators etc.); Understand the current European legal framework with regard to UAV’s; Awareness of the insurance and liability obligations when operating an UAV in the European airspace.

«How to buy an aircraft abroad?»

Length: 8 hours  
Methods: self-study, seminars, lectures  
Form of study: classroom  
Course language: Russian  
Price: 15600 Rub.  
Code: PSM-57

Learning objectives: The seminar will discuss practical issues related to the search for an aircraft abroad, especially the negotiation of the essential terms of the contract with the seller, the procedure for the customs clearance of the import of aircraft to the territory of the Russian Federation as a commodity, interaction with customs authorities and other relevant issues.
Learning objectives: Expand the professional knowledge in the field of aviation insurance.

We would like to inform you that the cost of the course is indicated as the minimum price and that the final price will be calculated depending on the number of students and the training venue.
